

# Golf players on par for 3D mammography

Did you know that golf players from Knox Club generously support Eastern Health patients via their annual charity golf day?

This year, the Club has supported the purchase of a new 3D mammography machine for the recently opened Eastern Health Breast and Cancer Centre at Maroondah Hospital.

Club members, including representatives of the golf day charity committee, attended the Centre recently to present a cheque to Eastern Health and to participate in a short tour of the new facility.

“A number of Knox Club members have been diagnosed with cancer and are patients at Maroondah Hospital,” explains Andrew Jensen, Treasurer, Knox Club.

“We are proud that our fundraising is directly benefitting their treatment.

“We value supporting a local charity and seeing our efforts benefit our members and the wider community,” says Andrew. “In fact, a number of our members have utilized the scalp cooling service that we supported in 2017.

“Our golf day is a very emotional day for everyone. At the end of the day, we ask anyone who’s had cancer to join us on stage for a sing-a-long to Monty Python’s *‘Always Look on the Bright Side of Life’*.”

It’s great to see everyone in the room sharing that emotion, knowing our fundraising is staying local,” says Andrew.
